ChemWorld PolyTreat

Belt Anti-Blinding System & Struvite Prevention System

Concentrated ChemWorld PolyTreat was developed for injection into reuse lines and into a waste treatment systems washbox for constant belt cleaning. ChemWorld PolyTreat improves sludge solids, belt press throughput, cleans polymer tanks and lines, cleans up polymer spills, and prevents belt blinding from polymer and sludge build-up. ChemWorld PolyTreat does not contain ammonia, solvent, acid, caustic, or silicate compounds. ChemWorld PolyTreat will pass: Priority Pollutant Scan EPA Method 624 and 625 along with acute toxicity analysis and belt fabric attack testing. Feed ratio is a guaranteed 20,000:1 ratio. In addition to the benefits above, ChemWorld PolyTreat prevents crystal agglomeration (Struvite) and gradually removes existing agglomeration.

ChemWorld PolyTreat was developed to replace and outperform nationally advertised Schaners Poly-Suppress™ at a more 'user friendly' cost.

PROPERTIES

Appearance:	Clear water white liquid
Odor:	Nil
pH (100% BV)	Neutral @ 6.5 - 7.5
Flash Point:	Product can not support combustion
Gravity:	1.00
HIMS:	0-1,0-0,0-0

BENEFITS

- Eliminates belt blinding and returns your belts to a like-new condition.
- Can increase your gallons per minute of sludge processing.
- Eliminates powerwashing or additional cleaning cycles.
- Can reduce polymer consumption and reduce sludge hauling costs.
- Prevents crystal agglomeration (Struvite) and gradually removes existing agglomeration.
- ChemWorld PolyTreat has a dilution rate of 20,000:1.

PRECAUTIONS Always wear protective clothing and eye protection when handling chemicals around heat, water, or water under pressure. Wash after handling. Product can be an irritant to the eyes; avoid eye contact. For industrial and commercial use only. Refer to MSDS for full product safety information.

STANDARD PACKAGING SIZES: Bulk, 330 + 275 gal, 55 gal, 30 gal, 15 gal, and 5 gal. containers.
OPTIONAL: Private labeling. Bulk container packaging from 1 oz to 5 gallons.
