Liquitron™ DC4000 Series Conductivity Controller

Applications

- *Cooling Tower*
- *Boiler*
- *Closed Loop Systems*

The DC4000 Series Conductivity Controller is a microprocessor based control system that will operate in a variety of water treatment applications.

The DC4000 provides a set point and relay for conductivity control, and a variety of timer functions to control chemical addition.

Programming this controller is simple and is accomplished using only three keys.

The backlit LCD display and LEDs provide visual indication of operating conditions and equipment status.
