ChemWorld Mask

Industrial Mask Wash Compound

DESCRIPTION:

ChemWorld Mask is a highly concentrated liquid mask wash compound containing film forming agents and water conditioners. ChemWorld Mask is designed for applying in industrial recirculating and/or brush coat operations. ChemWorld Mask provides a barrier on a clean racking system that allows paint and coatings to temporarily adhere to the coating, while facilitating easy coating removal in subsequent washing operations.

ChemWorld Mask is chemically very mild and will not attack rack solder areas. After ChemWorld Mask is air or heated air dried, it will not run or burn in paint or vacuum metalizing ovens (up to 700°F). ChemWorld Mask's liquid form offers excellent employee safety and convenience during tank additions and is completely non-hazardous (as reported on the material safety data sheet).

PRODUCT PROPERTIES:

Appearance:	Clear heavy liquid, odor nil.
Specific Gravity:	1.27
Solubility:	Complete
Flash Point:	None
pH(10%):	9.0
Biodegradability:	100% Biodegradable

USE INFORMATION:

Concentration:	10 - 12% by volume in an industrial mask washer
Temperature:	140 - 200°F is optimal for applying and evenly flash drying **
Contact Time:	Typical operational time as set-up by the washer manufacturer

** ChemWorld recommends that all surfaces be completely dry prior to introducing parts/racks into the painting operation.

PRECAUTIONS: May cause irritation to the eyes upon contact Prolonged contact may cause skin irritation. Wash thoroughly after handling.

STANDARD PACKAGING SIZES: Bulk, 330 + 275 gal, 55 gal, 30 gal, 15 gal, and 5 gal. containers.
OPTIONAL: Private labeling. Bulk container packaging from 1 oz to 5 gallons.
