Neptune™ Mixer Selection

PORTABLE MIXERS

Neptune™ offers a complete line of portable mixers for a wide variety of critical blending and mixing operations. Engineered to provide a long life and trouble-free operation, Neptune mixers are ideally suited for the following applications:

1. Blending liquids
2. Suspending or dissolving solids
3. Dispersing immiscible liquids
4. Dispersing small amounts of gases in liquids

Neptune mixers can be clamp- or base-mounted on beams, tank walls and other supports (angle of entry may be adjusted to meet specific mixing requirements). Neptune mixers are used in a variety of industrial applications, including waste treatment, water treatment and batch chemical preparation. These portable mixers are also ideal for mixing paints; varnishes; polymers; textile sizes and dyes; pharmaceuticals; soaps; and countless other materials from 1 to over 25,000 cP viscosity. Neptune mixers are available at either 350 or 420 rpm (gear-driven) or 1,750 rpm (direct-drive).

To help you select the proper Neptune mixer for your application, Neptune has developed the following guide to

provide users with valuable information such as specifications, dimensions and dimensional drawings. It is important to note that selecting the proper mixer depends on a number of parameters, including the size of the batch, viscosity of the components, final product and other parameters.

NEPTUNE MIXER SELECTION CHART

The chart below provides some basic guidelines for selecting the proper Neptune mixer(s) that offers mild blending of various viscosity liquids in different size tanks.

The information provided is based on an approximate mix/blend time of two liquids for 30 minutes, with both liquids already in the tank. Mixing times will be shorter if one liquid is added to a second liquid while the mixer is operating. Powders should always be added while the mixer is running.

This chart also applies to the suspension of solids with settling velocities of less than one ft. (304.8 mm) per min.

For more rapid or vigorous mixing, use a mixer one or two sizes larger.

Dual propellers are recommended for tanks 1,000 gal. (3,785.4 L) and larger at viscosities of 1,000 cP and higher.

VISCOSITY CP	UP TO 50 GAL. (189.3 L)	UP TO 100 GAL. (378.5 L)	UP TO 200 GAL. (757.1 L)	UP TO 500 GAL. (1,892.7 L)	UP TO 1,000 GAL. (3,785.4 L)	UP TO 2,000 GAL. (7,570.8 L)	UP TO 3,000 GAL. (11,356.2 L)	UP TO 5,000 GAL. (18,927.1 L)

For full specifications and information on the above mixers: Series JG - see page 4, Series JD - see page 8, Series BN - see page 10

THE NEPTUNE GUARANTEE: IF THE MIXER WE SELECT DOESN'T PRODUCE THE DESIRED PROCESS RESULTS, WE WILL REPLACE IT WITH A MIXER THAT WILL.

Proper Mixer Mounting and Positioning

In most applications involving small mixing tanks of 1,000 gal. (3,785.4 L) or less, the mixer is clamped to the side of the tank. Optimum mixing will be achieved when the mixer is angled from the tank wall, either off-center (figure 1) or on-center (figure 2). Improperly mounting a portable mixer will greatly lessen mixing efficiency, cause vibration and could possibly damage the mixer.

Angling off-center is preferred when good material turnover is required, as in mixing slurry. Angling on-center is desired for more gentle mixing and when vortexing must be minimized.

Larger size tanks may require that a mixer be mounted directly in the center of the tank with the shaft vertical (figure 3). When a mixer is used in this arrangement, baffles are recommended to prevent the contents of the tank from turning in the direction of the mix. If this occurs, mixing action will be poor.

Such baffling will avoid vortexing and allow mixing to be as thorough as possible. Neptune suggests that four baffles be used, located 90° apart and sized approximately 1/12 of the tank diameter. The baffle should not fully extend to the bottom of the tank and a gap should be provided between the baffle and the tank wall.

For assistance in choosing a mixer or to help solve your mixing problems, please call one of our sales engineers at +1 (215) 699-8700.

FIGURE 1 - Angling the portable mixer off-center is the position recommended by Neptune for rapid turnover of tank contents and good bottom washing.

FIGURE 2 - On-center angling will produce good mixing with minimum vortexing. Tank contents turn over thoroughly but gently.

FIGURE 3 - For mixing in larger tanks, the mixer is often placed vertically on-center. In this configuration, baffles are recommended to prevent the contents of the tank from rotating, avoid vortexing and achieve good mixing and top-to-bottom turnover.

JG Series Gear Drive Mixer

Clamp or Cup Plate Mount, Heavy Helical Gear, 350 rpm, Grease Lube

The most powerful mixers from Neptune for the most difficult mixing applications. These mixers feature a grease-filled gearbox that eliminates an oil seal and the possibility of oil contamination.

*Using AC motor/control package.

FEATURES AND BENEFITS

- No clutches to slip, wear or replace
- 316SS propellers and shafts are standard. Optional coatings such as rubber, PVC or PTFE also available
- Square-pitch 1:1 ratio marine propellers are used exclusively. Flow coefficients and power consumption characteristics equal those of the best hydrofoil impeller designs
- Vibration-absorbing pad standard
- Motors are available in TEFC or explosion-proof enclosures (1,750 rpm, 56C frame). Air motors also available
- Gears run in grease lubrication. Cannot leak oil
- All JG mixer shaft bearings are permanently lubricated
- Cast aluminum housing
- Mounting clamp has adjustable angle of entry by indexed ball-and-socket design to achieve various process results
- Fixed cup plate mount optional on 1/3 HP through 1-1/2 HP. Standard on 2 HP and larger models

FEATURES AND BENEFITS

JGF Series Mixers

Flange Mount

- Flange stuffing box rated to 15 psi (1.0 bar)
- Standard mounting flange is 6" (152.4 mm) carbon steel, 316SS optional
- Optional flanges available in 8" (203.2 mm), 10" (254.0 mm), 12" (304.8 mm), or 14" (355.6 mm)

JGR Series Mixers

Angle-Riser Mount

- Angle-riser mount provides a fixed 10° angle of entry

FEATURES AND BENEFITS

- Square-pitch 1:1 ratio marine propellers are used exclusively. Flow coefficients and power consumption characteristics equal those of the best hydrofoil impeller designs
- 316SS propellers and shafts are standard. Optional coatings such as rubber, PVC or PTFE also available
- JD mixers have adjustable angles of entry by indexed ball-and-socket design to achieve different process results
- Motors are available in TEFC or explosion-proof enclosures (1,750 rpm, 56C frame). Air motors also available
- Vibration-absorbing pad standard
- All JD mixer shaft bearings are permanently lubricated
- Variable speed drives available
- Cast aluminum housing
- Fixed-cup plate mount optional

BN Series Small Batch Mixer

1,750 rpm Direct Drive, Clamp Mount

BN Series mixers are the premier line of small direct drive mixers for mixing small batches of low viscosity fluids.

MODEL NUMBER	STANDARD MOTOR DESCRIPTION	DIMENSIONS INCHES (MM)	
		SHAFT LENGTH	SHAFT DIAMETER
TOTALLY-ENCLOSED FAN-COOLED (TEFC)			
BN-1.0	1/4 HP-1-115/230	32 (812.8)	1/2 (12.7)
BN-2.0	1/3 HP-1-115/230	32 (812.8)	1/2 (12.7)
BN-2.2	1/3 HP-3-230/460	32 (812.8)	1/2 (12.7)
BN-3.0	1/2 HP-1-115/230	32 (812.8)	5/8 (15.9)
BN-3.2	1/2 HP-3-230/460	32 (812.8)	5/8 (15.9)

BN-3.3	1/2 HP-3-230/460	32 (812.8)	5/8 (15.9)
AIR MOTOR			

To develop 1/4 HP at 1,725 rpm requires 10 cfm (0.28 cmm) at 15 psi (1.0 bar)
 1/3 HP at 1,725 rpm requires 12 cfm (0.34 cmm) at 20 psi (1.4 bar)
 1/2 HP at 1,725 rpm requires 22 cfm (0.62 cmm) at 40 psi (2.8 bar)

FEATURES AND BENEFITS

- Easy mounting. Clamp cannot slip, preventing propeller from hitting side of tank
- Quick, easy adjustment between "angled-on-center" and "angled-off-center" positions without tools
- Coupling is fully enclosed
- Motors are available in TEFC or explosion-proof enclosures (56C frame). Air motors also available
- Off-the-shelf delivery
- Shaft and prop 316SS
 - PVC coating available
- Clamp adjusts to any angle

L Series Laboratory Mixers

Bar, Clamp and Bracket Mount

Neptune laboratory mixers are available in air or electric drive with clamp or bracket mount.

- The air motors include a control valve and muffler
- Shaft and prop 316SS

The Model L-1-AC includes a C-clamp and the air supply pipe that passes through the C-clamp. Model L-1-A does not include a C-clamp but the air supply pipe will fit a standard 1/2" (12.7mm) laboratory bar clamp.

Cord and plug are standard with 1,550-rpm electric models. Operating speed ranges from 200 - 2,000 rpm with air motors.

MODEL	STANDARD MOTOR DESCRIPTION	MOUNT TYPE	RPM	DIMENSIONS INCHES (MM)

AIR MOTOR			
B-4.0	1/4 HP TO 1/2 HP AIR	35 (889.0)	5/8 (15.9)

To develop 1/4 HP at 1,725 rpm requires 10 cfm (0.28 cmm) at 45 psi (3.1 bar)
 1/3 HP at 1,725 rpm requires 14 cfm (0.40 cmm) at 60 psi (4.1 bar)
 1/2 HP at 1,725 rpm requires 18 cfm (0.51 cmm) at 80 psi (5.5 bar)

FEATURES AND BENEFITS

- Universal motor mount accepts 48 and 56 frame foot-mounted motors
- Motors are available in TEFC or explosion-proof enclosures. Air motors also available
- Off-the-shelf delivery
- Shaft and prop 316SS
 - PVC coating available
- Clamp adjusts to any angle

MODEL BF-7.4-27S

BF Series Direct Drive Air Mixer

Flange Mount

The Neptune flange-mounted, air-driven mixer utilizes a 316SS shaft and 316SS marine propellers.

Single propeller models have one left-hand propeller pumping downward in normal operation.

Dual propeller models have one each left-hand and right-hand propellers providing counterflow mixing.

Air control valve included to allow speed adjustment. Motor may be stalled without damage.

MODEL	MOTOR HORSEPOWER	DIMENSIONS INCHES (MM)

BF-8.4-60S	3 HP AIR MOTOR	7 (177.8)	1 (25.4)	60 (1,524.0)	10 (254.0)	10 (254.0)

Air set not included. Order P/N 100804 for complete air set consisting of regulator, filter and lubricator.

* To specify dual props: change "S" in Model Number to "D".

Air Consumption: 1 HP - 16 cfm (0.45 cmm) at 70 psi (4.8 bar)
 2 HP - 20 cfm (0.57 cmm) at 70 psi (4.8 bar)
 3 HP - 30 cfm (0.85 cmm) at 70 psi (4.8 bar)

BC Series Direct Drive Air Mixer

Clamp Mount

The Neptune BC Series clamp-mounted, air-driven mixer that uses a 316SS shaft and 316SS marine propellers.

Knob allows clamp to be loosened without tools to adjust shaft angle. Handle allows firm grip on mixer when positioning. Three blade, left-hand marine propellers pump downward in normal operation. Air control valve included to allow speed adjustment. Motor may be stalled without damage.

E and F Series Drum Mixers

Bung-Entering - 55-gal. (208.2 L), 1,750 rpm

Neptune offers a complete line of bung-entering mixers. These mixers come in two styles for water-like solutions with each style utilizing a folding propeller (E & F Series). For viscous fluids, two styles (H & HGS Series) are also available that use permanent blades and are offered in higher horse-powers. All Neptune bung-entering mixers fit through the standard 2" (50.8 mm) bung on 55-gal. (208.2 L) drums.

FEATURES AND BENEFITS

- Shaft and folding propeller are 316SS. Propeller folds for entry; opens to 3-3/4" (95.3 mm) diameter when operating
- All mixers are in stock for off-the-shelf delivery
- Motors are available in TEFC or explosion-proof enclosures (56C frame). Air motors also available

RGT Mixers

Use Series RGT mixers on single containers or containers sandwiched between stacked semi-bulk shipping containers.

Specialty Mixers: Hand-Held

Air-driven mixers that feature a cast aluminum pistol grip to comfortably fit the hand.

Used to mix small batches of thin or heavy liquids. Air control valve allows easy speed adjustment. Low speed mixing and stalling in heavy liquids will not cause overheating as with an electric mixer.

316SS multi-blade cage impeller will not damage container and is ideal for rapid, thorough mixing of paints, adhesives, drywall compounds, etc. Two impeller sizes and three shaft lengths fit most open top containers from 1 - 55 gal. (3.8 - 208.2 L).

MODEL	RECOMMENDED CONTAINER SIZE	DIMENSIONS INCHES (MM)	
		SHAFT DIAMETER AND LENGTH	MIXING HEAD DIAMETER
HH12	1 - 2 GAL. (3.8 - 7.6 L)	1/4 X 15 (6.4 X 381.0)	2-5/8 (66.7)
HH10	5 - 10 GAL. (18.9 - 37.9 L)	1/2 X 21 (12.7 X 533.4)	5 (127.0)
HH55	50/55 GAL. (189.3/208.2 L)	1/2 X 40 (12.7 X 1,016.0)	5 (127.0)

Specialty Mixers: Pipe and Pail-Mount

Pail Mixers – Pipe Clamp

Ideal for mixing materials in 5-gal. (18.9 L) containers and other open containers. Mixer clamps to a vertical 1-1/2" (38.1 mm) pipe that allows it to be lowered into container and raised to change containers.

FEATURES

- Air control valve for speed adjustment
- Folding propeller optional

MODEL B-4.0P

MODEL	STANDARD MOTOR DESCRIPTION	DIMENSIONS INCHES (MM)		
		SHAFT LENGTH	PROPELLER DIAMETER	SHAFT DIAMETER
B-4.0P	1/4 HP - 1/2 HP AIR REQUIREMENTS: 10-17 CFM (0.3-0.5 CMM) AT 50-80 PSI (3.4-5.5 BAR)	24 (609.6)	4 (101.6) FIXED	5/8 (15.9)
B-4.0P-D	SAME AS ABOVE EXCEPT WITH DUAL PROPELLERS			

Pail Mixers – Rim Clamp

Convenient mixer for mixing materials in 5-gal. (18.9 L) closed pails. The handle/motor assembly adjusts along the center line of the pail to align with the opening in pail lid.

FEATURES

- Air control valve for speed adjustment on air motor model

MODEL	STANDARD MOTOR DESCRIPTION	DIMENSIONS INCHES (MM)		
		SHAFT LENGTH	PROPELLER DIAMETER	SHAFT DIAMETER
PAM-6.0	1/2 HP - 1 HP AIR REQUIREMENTS: 22-40 CFM (0.6-1.1 CMM) AT 40-80 PSI (2.8-5.5 BAR)	12 (304.8)	3-3/4 (95.3) FIXED	5/8 (15.9)

HandleBar Pail and Drum Mixers

Popular for mixing open and closed head containers from 5 - 55 gal. (18.9 - 208.2 L). Can also be used to mix mortar, drywall compound and similar materials in 5-gal. (18.9 L) containers.

- Air control valve allows easy speed adjustment.
- Low speed mixing and stalling will not overheat as with an electric motor.
- Optional "deadman" trigger on right handle allows mixer to be started and stopped conveniently while maintaining grip with two hands. Specify Part Number 004646

MODEL HAJ-3.0

MODEL	RECOMMENDED CONTAINER SIZE/TYPE	DIMENSIONS INCHES (MM)		
		SHAFT DIAMETER AND LENGTH	PROPELLER TYPE	PROPELLER SIZE
HAI-3.0	TO 10 GAL. (67.9 L) OPEN HEAD	1/2 X 21 (12.7 X 533.4)	CAGED IMPELLER	5 (127.0)
HAI-3.1	TO 55 GAL. (208.2 L) OPEN HEAD	1/2 X 40 (12.7 X 1016.0)	CAGED IMPELLER	5 (127.0)

All mixers above use air motor rated from 1/2 - 1 HP using 22 - 40 cfm (0.62 - 1.13 cmm) at 40 - 80 psi (2.6 - 5.5 bar).
